EXPERIENCE

FrontEnd

Web Roots

June 2025 – June 2026 Cairo

- Implemented responsive user interfaces using Next, JavaScript, HTML, Tailwind, and CSS, ensuring seamless performance across desktop, tablet, and mobile devices.
- Integrated REST APIs to fetch and display dynamic data, enhancing user experience and improving data accessibility.
- Built a full-featured professor landing page with 5+ reusable UI components and optimized user flow to improve appointment booking accessibility.
- Identified, investigated, and used Problem Solving to resolve 5+ frontend bugs, contributing to improved application stability and user satisfaction.
- Developed 10+ responsive pages using Next.js and Tailwind CSS.
- Participated in code reviews, testing, and deployment activities while following coding standards and development best practices.
- Developed and maintained 10+ reusable React components to support new product features and improve consistency across the company's web applications.
- Reduced 5+ code duplication through reusable component architecture.
